PROFESSIONAL SUMMARY

Enthusiastic and detail-oriented Computer Science student passionate about software development with hands-on experience in full-stack web-development using Java, Spring Boot, MongoDB, and RESTful APIs. Skilled in backend and full-stack technologies with growing interest in data protection and secure system design. Passionate about algorithmic problem-solving, data-driven systems, with strong foundations in data structures and algorithms. Aiming to apply my technical skills to create secure and reliable software systems.

EDUCATION

Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore(M.P.) - India **CGPA:7.42**
B.Tech Computer Science Engineering | Expected Graduation: June 2026

WORK EXPERIENCE

Software Engineering Virtual Experience Program by Accenture

- Developed responsive UI components using HTML, CSS, JavaScript, and Bootstrap.
- Built backend modules using Java and Spring MVC to support scalable feature development.
- Designed and integrated RESTful APIs with optimized SQL queries. improving data retrieval performance.
- Conducted UI testing resulting in 30% improvement in user engagement.

PROJECTS

KrishiMitra - AI-Powered Crop Marketplace | React.js, SpringBoot, Gemini AI, MongoDB

- Designed and developed a scalable crop marketplace backend using Spring Boot.
- Implemented a REST APIs for user authentication, crop listings, and order handling.
- Integrated Google Gemini AI for crop/soil analysis and Stripe for secure payments.
- Achieved reliable REST API test coverage using Postman and JUnit, ensuring robust backend performance.

TalkSync - Real-Time Group Chat | Spring Boot, Bootstrap, WebSockets, MongoDB

- Developed a real-time chat using WebSockets and Spring Boot.
- Designed REST APIs for room management and persistent messaging using MongoDB.
- Implemented live updates, auto-scroll, and typing indicators.

Distributed E-commerce Order System | Microservices, MongoDB, Docker

- Implemented microservices using SpringBoot and event-driven communication using Kafka.
- Secured services using Spring Cloud Gateway and OAuth2.
- Containerized services using Docker for deployment readiness.

ChainReview - Job Assignement Platform | Solidity, Ethereum, Smart Contracts, React

- Developed smart contracts in Solidity for decentralized job creation and verification on Ethereum.
- Manage secure transparent task using Ethereum block-chain to handle job creation, assignment.
- Designed the contract architecture for gas efficiency and seamless interaction with the React.js frontend.

TECHNICAL SKILLS

- **Languages:** Java, Python(basic), SQL, HTML, CSS, C++
- **Databases:** MySQL. PostgreSQL. MongoDB
- **Backend Frameworks:** Spring MVC, Spring Boot
- **Data Analytics:** SQL Queries, Data Cleaning, Feature Engineering
- **Tools:** Git, Postman, JUnit, VS Code, intelliJ. Eclipse
- **Cloud Platforms:** AWS (S3. EC2). Google Cloud

CERTIFICATIONS

- Programming in Java - NPTEL
- DSA using Java
- MongoDB for Java - MongoDB
- AWS Cloud Practitioner - AWS

HONORS AND AWARDS

- **Solved 200+ algorithmic problems** across LeetCode. HackerRank, InterviewBit. and SPOJ.
- Contributer certificate from GirlScript Summer of Code(GSSoC).
